AMETEK Solidstate Controls

AMETEK Solidstate Controls (SCI) is pleased to announce the introduction of four new Upgrade kits to its legacy UPS product lines:

- Voltage Control Board Upgrade for Battery Chargers
- Oscillator/Sync Board Upgrade for Inverters
- Crest Factor Board Upgrade for Static Switches
- An Externally Mounted 3-Position Manual Maintenance Bypass Switch

In keeping with our philosophy of supporting units in the field as long as practical (more than 25 years in many cases!), we have created these upgrades for SCI's analog-based, non-microprocessor equipment. Although these upgrades are designed to be installed during a regularly scheduled PM, they can be scheduled as a stand-alone service trip.

A board upgrade to your existing equipment is an economical solution to improving your system's performance, and extending the life of your units. The 3-position manual switch, although not a new product or upgrade, can add reliability and safety to an already installed system, or increase the flexibility and ease of installation for a new UPS or Inverter.

For additional information or to schedule a service, contact Jean Falor or Jim Ackinclose of the SCI Client Service group at 614-846-7500; or by e-mail at [jean.falor@ameteksoci.com](mailto:jean.falor@ameteksoci.com); or [jim.ackinclose@ameteksoci.com](mailto:jim.ackinclose@ameteksoci.com).

For a detailed description of these upgrades, go to <http://www.solidstatecontrolsinc.com/support/index.html>

AMETEK Solidstate Controls is a recognized leader in UPS systems for industrial applications and power generation. It specializes in the design and manufacture of highly customized inverters and UPS systems for critical processes involving harsh environments such as power generation (including fossil fuel and nuclear power utilities).

AMETEK Solidstate Controls has administrative and manufacturing operations at its 875 Dearborn Drive, Columbus, Ohio, location. It is a unit of AMETEK, Inc., a leading global manufacturer of electronic instruments and electric motors with annual sales of more than \$1 billion. All of its products are marketed through an independent network of manufacturer's representatives and distributors in the United States and 27 foreign countries. Solidstate's commitment to the customer service continues long after the sale with a worldwide network of skilled, experienced field service technicians available for UPS installation, start-up, on-site service, and training.
